DETAILED ACTION

1. Claims 14-21 are currently pending in the instant application.

Response to Amendment

2. Applicants' Amendment and Response, submitted June 3, 2009m has been reviewed by the Examiner and entered of record in the file. Accordingly, claims 12, 13 and 22-24 have been cancelled.

Priority

3. The instant application is a 371 National Stage Entry of PCT/HU2005/000002 filed January 25, 2005, which claims benefit of Hungarian Patent Application P0400270, filed January 27, 2004.

Previous Claim Rejections - 35 USC § 112

4. Claims 13, 19 and 24 previously rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 13 and 24 have been cancelled. In view of Applicants' persuasive arguments to the claims, the Examiner withdraws the indefiniteness rejection of claim 19.

Previous Claim Rejections - 35 USC § 103

5. Claims 12, 13 and 22-24 previously rejected under 35 U.S.C. 103(a) as being unpatentable over the Rostein et al abstract. Applicants have cancelled claims 12, 13 and 22-24, rendering the obviousness rejections moot.

REASONS FOR ALLOWANCE

6. In view of Applicant's cancellations, claims 14-21 are allowable over the prior art, as newly renumbered claims 1-8. The following is an examiner's statement of reasons for allowance:

This invention relates to a novel process for preparing a salt of butoconazole nitrate in high purity. The allowable process is described in steps (a)- (c) of claim 14. Certain diaryl-butoconazole nitrates are known in the art as having the antifungal activity, however the aspect of preparing the instant claimed salt of butoconazole nitrate by utilizing the starting material 1-chloro-4-chlorophenyl-2-butanol and then reacting with imidazole in a mixture of a water immiscible solvent and aqueous solution of an alkali metal hydroxide or carbonate, in the presence of a phase transfer catalyst, is novel and unobvious. After a thorough search, the closest of prior art, Rotstein, et al. was found to teach similar butoconazole nitrate salts as anti-fungals. However the Rosteine et al article fails to teach or render obvious the instant claimed process according to claim 14, and does not fairly suggest the same high levels of purity as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
